Summary

Front end designer/developer with 14 years experience in both corporate and agency environments. Top notch expertise designing and developing within global web and platform application standards for a variety of user types, use cases, screen sizes, devices, browsers and platforms. Expertise in current and trending HTML/CSS/Javascript implementations including relevant build frameworks, preprocessors, task runners, and source control systems.

Professional Interests

User interface design and development for applications, software, games, kiosks, and real world product applications. Problem solving, data research/visualization, product design + development, interface technology, materials, DIY.

Work Experience

Freelance, UI Designer + Developer

06/12 – present, Denver CO

- Participate in the design and development of large and small applications for clients ranging in size from startups, non-profits, to publicly traded companies.
- Develop (*and/or support existing*) pixel perfect CSS styles, HTML markup, and Javascript based on visual mockups from design team or myself.
- Develop dynamic styleguides, skins, and production assets (*based on new or existing visual brand standards*) that accommodate the needs of native software development teams, both abroad and domestic.
- Educate clients on the state of their applications as it relates to ux best practice, relevant competition, front-end standards and their efficiencies, and asset management strategy.
- Educate clients with examples of newer technologies and implementations thereof.
- Clients include: Aetna, Blue Dot Solutions, CollegeInvest, Deloitte, EffectiveUI, Envysion, On3 Software, ServiceSource, Smith & Beta, Spex, Tack Mobile, Welltok, Wildlands Restoration Volunteers

EffectiveUI, Art Director + Visual Interface Designer

06/07 – 07/12, Denver CO

- Worked with clients and small internal breakout teams (*typically consisting of user experience professionals, designers, and developers*) in conceptualizing and creating the user experience, user interaction, visual look and feel, and application standards for a variety of digital interfaces.
- Delivered ux, visual, and production designs (*preparing visual mockups for client development teams*) in a wide variety of formats including, visual mockups, styleguides, MVP prototypes, and vision demos.
- During the latter part of employment I acted as one of two ux team directors interviewing new hires, liaising with department leads, gathering team consensus, and general department client representation.
- One of two in-house infographic artists
(*published in Forrester Research, Journey Map For A Telecom Company: Bodine, K. (2012). Top 10 Ways To Improve Digital Experiences. Forrester Research, Inc.*)
